Readiness...
Greater Security!
The Replacement
Option...a win-
ning program for
the logistics
demands of the
21st century.

**Repairable Item
Replacement Option**

R I R O

R I R O

**REPAIRABLE ITEM
REPLACEMENT OPTION**

RIRO The Repairable Item Replacement Option ... RIRO

A program designed by the US Navy to improve the logistics support provided to the international customer.

RIRO ... the **REPLACEMENT OPTION** ... An innovative compliment to traditional FMS Repair of Repairables (RoR) Programs.

REPLACEMENT OPTION participants will no longer have to wait for specific repairable items to be:

- ▶ Shipped by their own maintenance organizations
- ▶ Received by a US Navy Depot
- ▶ Tested ... Evaluated ... and Repaired
- ▶ Finally ... Returned to the customer

Using RIRO, FMS customers can draw ...

DIRECTLY FROM US NAVY STOCKS ... specifically identified:

- ▶ Weapons Replaceable Assemblies (WRAs)
- ▶ System Replaceable Assemblies (SRAs)
- ▶ Other designated repairable spares

RIRO Material Covered

ITEMS COVERED by the Replacement Option are:

- ▶ Specifically approved by the Naval Inventory Control Point (NAVICP) in conjunction with US Navy's Hardware Systems Commands (HSCs)

MATERIAL SUPPORTED includes spares for:

- ▶ Major weapons systems
- ▶ Sub-systems
- ▶ Support equipment

SPARES ASSIGNED must be identified as 7 COG material. 7 COG material is:

- ▶ Repairable
- ▶ Managed by the NAVICP
- ▶ Supported in inventory through appropriations from the Navy Capital Working Fund {formerly the Defense Business Operating Fund (DBOF)}

RIRO Requirements

To participate in the Replacement Option Program an FMS Customer must:

- ▶ Select 7 COG items to be covered by the Replacement Option
- ▶ Verify that NAVICP and HSC support RIRO for the selected items
- ▶ Assign approved items to a Cooperative Logistics Supply Support Arrangement (CLSSA)
 - FMSO I ... Equity Investment Case
 - FMSO II ... Open Ended Requisition Case
- ▶ Requisition approved failed 7 COG items
 - Directly from US Navy stock
 - Using CLSSA FMSO II case
- ▶ Return failed repairable items to the US Navy for depot repair and reintegration into US Navy stock

RIRO Why Participate?

The Replacement Option ... Reduces Repair Turn Around Times (RTATs) ...

Resulting in less system down time awaiting parts ...

Meaning ... Greater deployability and employability for critical systems and platforms ...

Equaling ... Increased Readiness ...

Providing ... Greater Security!

RIRO RIRO Saves Money!

Reduced RTATs ... Lessen the demand for extremely large stores of in-country Gross Requirements List (GRL) and Coordinated Shorebased Material Allowance List (COSMAL) repairable spares.

Smaller in-country stocks of GRL & COSMAL repairables:

- ▶ Lower the initial investment costs for GRLs & COSMALS
- ▶ Lower the material storage costs for GRLs & COSMALS

RIRO Remember ... the Replacement Option is:

- ▶ Flexible
- ▶ Easy to implement and use
- ▶ Cost Efficient
- ▶ Complimentary to existing RoR programs

RIRO ... the Replacement Option ... Reduced Costs ... Increased Readiness ... Greater Security!

A winning program for the logistics demands of the 21st century!
